

Straight Teeth Are Healthier Teeth!

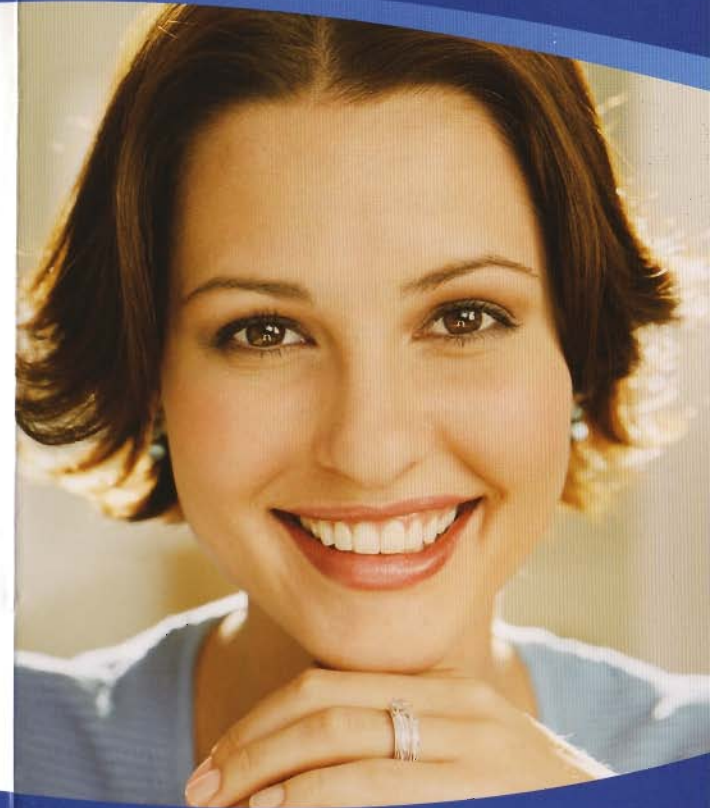

Never underestimate the power of a great smile. Straight teeth are not only beautiful, they also promote good health.

Did you know that...

- Straight teeth can help reduce the incidence of heart disease, gastrointestinal disease, and other health conditions.
- Teeth that are properly aligned chew more efficiently, aiding in proper digestion.
- Teeth that are straight and properly aligned create a more perfect bite, and that avoids excessive stress, headaches, and strain on your supporting bone and tissue.

OrthoClear™

What is OrthoClear?

OrthoClear is the advanced way to straighten teeth and improve smiles. Using the latest medical imaging technologies, OrthoClear manufactures clear aligners that rapidly straighten teeth. Each aligner is worn for 3 weeks, and can be removed to eat, brush, and floss. During wear, your teeth are gently moved to their desired position. The length of the process depends on your specific situation and the complexity of your case.

Getting Started with OrthoClear is Easy!

Straight Teeth in 6 Simple Steps

Step 1 - Discuss OrthoClear with your dental professional.

Step 2 - Your doctor will take impressions of your teeth and send them to us, along with your personalized prescription.

Step 3 - OrthoClear will create customized aligners designed to fit your teeth precisely.

Step 4 - You'll wear each set of aligners for three weeks - taking them out to eat, brush, and floss.

Step 5 - Periodically you'll visit your doctor to ensure your treatment is progressing as planned, and will make changes as necessary.

Step 6 - Once you've finished wearing your aligners, you'll enjoy a beautiful smile!

OrthoClear aligners are:

- **Clear** Most people won't even know you're wearing them
- **Comfortable** OrthoClear's plastic aligners are gentle in your mouth
- **Removable** Take them out to eat, brush, or floss
- **Hygienic** The smooth surfaces stay cleaner
- **Affordable** In most cases, the cost is comparable to braces
- **Fast** Get to a beautiful smile quickly

OrthoClear Can Work For You!

People aren't born with perfect teeth. For many patients, OrthoClear creates that beautiful smile.

And while OrthoClear works for most people, only a trained OrthoClear dental professional can tell you if this revolutionary product will work for you.
